

LATICE HAWAI'I

HOW TO PLAY

STOP! READING IS THE WORST WAY TO LEARN HOW TO PLAY
A GAME. INSTEAD, GO ONLINE and watch the video:

lattice.com/how

HERE'S HOW IT WORKS...

Lattice is a strategy game where you match tiles by color and shape. You win by being the first player to play all your tiles.

You play by matching tiles from your rack...

...with tiles on the board.

Earn STONES by matching on more than one side.

Spend stones for additional moves to play more tiles.

Use WIND TILES to change the layout of the board

and earn more moves by playing on special squares.

Combine all of the above to create exciting combo plays, clear tiles from your pool faster, and WIN!

...AND HERE'S HOW TO PLAY

LATICE

INSIDE THE BOX

1 Game Board 16 Sunstones 20 Halfstones
84 Tiles (72 Color Tiles + 12 Wind Tiles)

The color tiles have 6 different colors, 6 different shapes, and there are 2 of each tile.

Need something? We're happy to help. support@adacio.com

SETTING UP THE GAME

Put all color tiles and wind tiles face down in a pile and shuffle them together. Divide them evenly into player pools.

TILES EACH

TILES EACH

TILES EACH

TOURNAMENT-STYLE SETUP

Prefer more skill and less luck in your game? Shuffle the color tiles separately from wind tiles and divide them into even player pools. Then, equally distribute wind tiles to each player to shuffle into each personal pool.

After dividing the tiles, each player draws five tiles from their pool and places them on their rack.

Have more than four players?

Pair up for team play! Choose a partner to play with and strategize your way to victory. After all, two heads are better than one.

Looking for more ways to play?
Check out our website: lattice.com/more

STARTING THE GAME

The youngest player goes first by placing one tile from their rack on the center (moon) square and then completes their turn by drawing one tile from their pool.

You only draw new tiles at the end of your turn.

ON YOUR TURN

The first move of your turn is always FREE. Choose from one of these four moves:

- PLAY A COLOR TILE
- PLAY A WIND TILE
- EXCHANGE TILES
- PASS

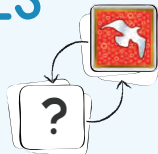

PLAY A COLOR TILE

When you play a color tile, you add it to the board next to an existing tile, matching all adjacent (not diagonal) tiles by either color or shape. The tile may connect by any or all of its four sides, but each side must match by color or by shape (or both!) Each color tile you play counts as one move.

EXCHANGE TILES

You can use a move to exchange some or all of the tiles from your rack for an equal number of new tiles from your pool.

Remove the tiles you wish to exchange from your rack, draw and place an equal number of new tiles from your pool into your rack (no peeking), then shuffle the exchanged tiles back into your pool. Each exchange of tiles counts as one move.

PLAY A WIND TILE

When you play a wind tile, you can shift any previously placed tile up, down, left, or right to an open adjacent square. Each wind tile you play counts as one move. After playing a wind tile, discard it, and take one free extra move.

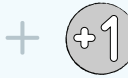

Play a Wind Tile
(Discard to pile)

1
Shift a Tile

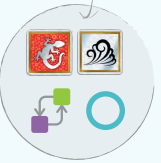

2
Play an Extra Move

+ EXTRA MOVE

After playing a wind tile, you get a free extra move. Play a color tile, do an exchange, or even play another wind tile (if you have one in your rack). No stones required!

3 THINGS

- 1 When you play a wind tile, the tile you shift on the board does not have to match adjacent tiles.
- 2 When you play a color tile with the extra move, its placement does not have to be related to the tile you shifted with the wind.
- 3 A tile moved with a wind tile may be shifted away and detached from other tiles on the board.

PASS

You may pass your turn for free instead of playing a move. If you can't play a tile or make an exchange, you must pass.

TIP It's usually better to exchange tiles, rather than pass.

Can I play more than one move during my turn?

YES! Find out how on the next page

STONES & EXTRA MOVES

After the first FREE move of your turn, spend either 1 sunstone or 2 halfstones to play each additional move.

Spend One Sunstone

OR

Spend Two Halfstones

Play an Extra Move

You may buy multiple moves during your turn and can continue playing until you either run out of stones or run out of tiles in your rack. Stones you earn can be spent immediately or saved for later.

EARNING STONES

To earn a stone, place your tile so it matches the color or shape of more than one tile already on the board. Only collect stones as described below. (No swapping sunstones for halfstones)

DOUBLE

Played tile matches by color or shape on any 2 sides

earn one halfstone

TREFOIL

Played tile matches by color or shape on any 3 sides

earn one sunstone

LATICE

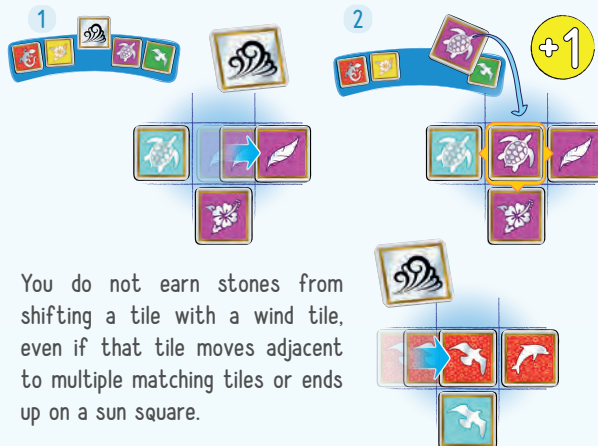

Played tile matches by color or shape on all 4 sides

earn two sunstones

TIP Use wind tiles to your advantage! Play a wind tile to set yourself up on the board, then earn stones by playing a color tile with the extra move.

You do not earn stones from shifting a tile with a wind tile, even if that tile moves adjacent to multiple matching tiles or ends up on a sun square.

SUN SQUARES

When you play a tile on a sun square, you earn one sunstone. This sunstone is earned in addition to all other stones earned.

Sorry, using a wind tile to shift a tile onto a sun square doesn't count.

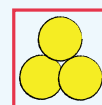

TIP Use a wind tile to uncover a Sun Square.

SUNSTONE LIMIT

If you have more than three sunstones at the end of your turn, the extra stones must be discarded.

Halfstones are unlimited.

TIP Rather than discard extra sunstones, consider buying a wind tile (see next page).

WIND BUY-BACK

If you have fewer than five tiles on your rack, you can buy back a wind tile from the discard pile. This action does not count as a move and can be done anytime during your turn. Use a move to play the wind tile immediately or save it for later.

* Sunstones only, no halfstones

Spend Three Sunstones
(2-3 Player Game)

Spend Two Sunstones
(4 Player Game)

Take a Wind Tile from
the shared discard pile

ENDING YOUR TURN

Your turn ends when you can't play any more moves, have played all five tiles in your hand, or choose not to continue your turn. At the end of every turn, if you have fewer than five tiles on your rack, draw tiles from your pool until your rack contains five tiles.

If you don't have enough tiles left in your pool to reach five tiles, draw all the remaining tiles. Play continues clockwise.

ENDING THE GAME

You win by being the first player with no tiles left in either your pool or rack. If all players are forced to pass, the player with the fewest remaining tiles wins. If players have an equal number of remaining tiles, it's a tie.

THANK YOU FOR PLAYING LATICE

Happy?

We're just happy that you're happy.
If you don't know how to express your newfound joy,
we've got a few suggestions...

Tell your friends and family.

Leave a review on **Amazon**.

AN EXAMPLE TURN

See a complete game example at latice.com/how

1 First move: Play a color tile to make a Trefoil

2 Buy a move to play a wind tile  ...then use the extra move to make a Lattice on a Sun Square

3 Buy an Exchange to try for better tiles 

4 Buy a move to play a color tile and make a Double 

5 Buy a move to play a color tile on the Sun Square 

ALL 5 TILES PLAYED!

Draw new tiles and continue with the next player

MORE WAYS TO PLAY

FAST START

Draw nine color tiles and place them in an X formation with the moon square at center, as shown. Distribute all remaining tiles starting with the first player. Each player starts with one sunstone. Play proceeds as usual.

SPIKE

Draw 21 color tiles and place them in an star formation with the moon square at center, as shown. Distribute all remaining tiles starting with the first player. Each player starts with one sunstone and one halfstone. Play proceeds as usual.

ENDGAME

Draw 33 color tiles and place them in a large star formation with the moon square at center, as shown. Distribute all remaining tiles starting with the first player. Each player starts with two sunstones. Play proceeds as usual.

KIDDIE MODE

For younger kids, set the wind tiles aside so they can practice matching colors and shapes. Play one move per turn and award a halfstone for matching on one side and a sunstone when matches are made on more than one side.

MATCH PLAY

Normal match: The first player to win 2 games wins the match (ties don't count).

Championship match: Same as normal match but 3 games are needed to win.

MORE THAN FOUR PLAYERS?

You can play in teams or you can combine two Lattice sets and place the boards side by side. Distribute the tiles evenly and use **Fast Start**, **Spike** or **Endgame** (above) on both boards to get things started. Play proceeds as usual with players free to play on either of the two boards.

TIMED MATCHES

Use the timer to limit each player's turn to no more than one minute. If the player hasn't completed their turn when the timer runs out they should stop and draw tiles.

Or you can play two player timed matches with a chess timer.

Regulation play: 5 minutes per player plus 6 seconds bonus time per turn.

Blitz: 3 minutes per player plus 5 seconds bonus time per turn.

Bullet: 90 seconds per player plus 4 seconds bonus time per turn.
